Dear [redacted]

Thank you for agreeing to address the Advanced Intelligence Seminar on Tuesday, November 27 from 2:00 to 4:00 p.m. on the subject of "Technology Transfer--A National Security Concern."

The Advanced Intelligence Seminar is comprised of 20 middle-level officers (GS-13 through GS-15) who have normally been with the Agency 10 to 15 years and who, therefore, bring to the class a broad range of backgrounds and experience. The two and one-half week Seminar is designed to broaden the professional outlook and understanding of the participants by presenting overviews of selected domestic and international issues and trends that affect U.S. foreign policy and national security interests.

Our offices are located in the Arlington Chamber of Commerce Building, 4600 North Fairfax Drive (see enclosure for map of our area). The visitor parking lot is approached by turning off Wilson Boulevard onto North Wakefield Street. Parking spaces 16 and 17 are reserved for our visitors.

To facilitate entering our building on a continuing basis, would you please have your SCI accesses permanently certified through your SSO network to CIA's Compartmented Information Branch, Office of Security, for passage to the Office of Training and Education. If you have a top secret clearance, please have it certified to Chief, Clearance Division, CIA or call [redacted] for passage. Following receipt of this information, we can make arrangements to give you unescorted access during your visits to the Chamber of Commerce Building.

STAT

Enclosed is a scope note of your presentation; please let us know at your earliest convenience if you wish to make any changes so that we may incorporate them into our agenda. Any changes or other questions should be referred to [redacted] the Course Director, or [redacted] the training assistant, on [redacted]

SCOPE NOTE

TECHNOLOGY TRANSFER--A NATIONAL SECURITY CONCERN

The use of American science and technology in the rapid increase in Soviet military strength over the past decade has aroused substantial concern in the current Administration. Federal agencies have taken steps to try to control the flow of data and information from scientific research as well as the sale of high-technology equipment to our adversaries. Mr. Wu will illustrate some of the major technology losses to the Soviets and define the political, economic, and military dimensions of the problem.
